ULTRA-LOC SOLID SWIMMING POOL COVER

WINTER CHEMICAL TREATMENT INSTRUCTIONS FOR YOUR ULTRA-LOC SOLID COVER

When closing your pool in the fall, we recommend the use of a winterizing chemical kit, which includes winterizing algaecide. Contact your dealer for information on additional winter sanitizers appropriate for your pool, i.e. **gunite** or **vinyl**. When winterized properly, spring clean up will be kept to a minimum.

One month before opening your pool, or when temperatures of 60° or higher remain constant, additional algaecide should be added to the pool. Periodic additions of sanitizer may be needed to maintain proper water chemistry and reduce algae growth.

Automatic pool cleaners may be used underneath your ULTRA-LOC SOLID cover.
